

# Case Study:

## Transforming Ornuva Foods UK Office into a Warm, Welcoming Space

When Ornuva Foods UK approached Fenns, they were ready to revitalise a tired, dated office environment into a modern, uplifting workspace that inspires collaboration, comfort, and wellbeing. The brief was to deliver a full furniture fit-out solution that would enhance the working environment while respecting the functional needs of different teams.

Foods

### The Vision

Ornuva Foods UK wanted a space that balanced practicality with warmth, one that felt cohesive, but not fully open-plan. A key element of the brief was reconfiguring the layout, moving certain teams out from enclosed offices into a shared workspace to encourage collaboration, while converting the smaller rooms into additional meeting spaces and a dedicated boardroom.

We worked closely with Ornuva Foods UK's marketing team to ensure every design element aligned with the company's brand identity and colour palette.

#### 1. New Flooring

Worn carpets were replaced with a soft, high-quality floor finish. This instantly refreshed the space, offering both visual sophistication and improved comfort underfoot.

#### 2. Brand-Led Colour Scheme

We introduced a calming colour palette, inspired by Ornuva Foods UK's branding. Soft greens, and earthy neutrals fostered a calming, professional atmosphere, while introducing subtle biophilic elements to support wellbeing and focus.

#### 3. Reconfigured Layout with New Purpose-Driven Space

Inline with the original brief, we avoided fully open-plan layouts. Departments were strategically placed in shared zones that support collaboration while preserving acoustic privacy. Former smaller offices were converted into versatile meeting rooms with a dedicated boardroom, enhancing space efficiency.

#### 4. Acoustic Solutions for Focus and Privacy

Stylish acoustic wall panels were installed throughout the office to support noise control and privacy. We also integrated private booths, offering quiet areas for focused work, particularly important in the new shared zones.

#### 5. Soft Furnishings & Breakout Areas

We created inviting informal spaces using plush, curved sofas and tactile fabrics, perfect for spontaneous collaboration or restorative breaks. These areas encourage a more relaxed, people-first atmosphere in the office.

#### 6. A Distinctive Boardroom

The boardroom was transformed with modular furniture, acoustic treatments, and a refined aesthetic aligned with the company's branding. While Fenns did not deliver the integrated tech, the layout was designed with plug-and-play compatibility in mind, supporting seamless meetings, and virtual presentations.

#### 7. Upgraded Kitchen Area

The kitchen was refreshed with new flooring, cabinets, and worktops in contemporary finished, offering a clean, stylish space where employees can recharge and connect.

#### The Results

The result is a cohesive, comfortable office that reflects Ornuva Foods UK's culture and identity. The new layout supports the teams needs, balancing collaborative and quiet spaces while maximising the use of the space.

In close collaboration with Ornuva Foods UK's marketing team and with careful attention to their brand colours and tone, we delivered a workspace that's both functional and reflective of the company's values. With soft textures, ergonomic furniture, and clearly defined zones, the office is now a people-focused environment where employees feel supported and inspired.
